

How We Celebrated Vinayaka Chavithi 2026 at Clyptus Software Solutions

Vinayaka Chavithi is always a special time at Clyptus Software Solutions. No matter how many days the festival lasts, our team goes above and beyond to make it memorable.

As the ERP market evolves rapidly, we as an ERP service provider adapt continuously. From office decor to selecting a magnificent Ganesha idol, our team at Clyptus evolves with the times.

Blending Innovation with Tradition

Since the tech world is driven by AI, we decided to integrate smart tools into our festival planning—using AI to brainstorm decor concepts, design custom event T-shirts, and communicate the essence of the festival in an interactive, engaging way. We also used cloud tools to send dynamic digital invitations to our team and clients.

As a creative company branding initiative, we designed custom T-shirts featuring Lord Ganesha in a typography word-art format. Placed right on the stomach of the design was a functional QR code pointing directly to our company website (clyptus.com).

The 7-Day Journey: Day-by-Day Highlights

Our celebrations spanned 11 active days. Every evening after work, employees stayed back late to transform our workspace into a grand sanctuary for Lord Ganesha. Management provided complete support, arranging late-night meals and safe cab transport for everyone working on decor.

Day 0: The Arrival & Setup

On the Sunday before the festival, everyone was working hard on decorations. Real flowers demanded late-afternoon effort, and I went out to bring our Lord Ganesha idol from the Ratnadeep store. The moment I saw the idol—tall, elegant, and beautiful—I knew it was perfect. Armed with my DJI Pocket camera, I captured the entire arrival from every angle. Carrying the heavy idol onto the setup stage took genuine teamwork, but once it was set, the festive vibe filled the entire office.

Day 1: Pooja, Tradition, and Diversity

Employees arrived dressed in vibrant traditional attire, turning our workplace into a temple setting. Even with our team's diverse backgrounds, every single person contributed. We had three idols placed for pooja, listened to Ganesha stories, and shared prasadams. The delicious food kept our spirits high and everyone energized.

Days 2 to 4: Balancing Work, Rituals, and WFH

Morning and evening poojas went hand-in-hand with our daily project deliverables. Employees extended hours by spending dedicated time for prayers, enjoying changing daily prasadams, and utilizing flexible Work-From-Home (WFH) options enabled by management.

Day 5: Lakshmi Ganapati Pooja & Unique Traditions

Late the night before, our women colleagues stayed back to tie bangles in a precise sequence, creating a beautiful garland of bangles for Day 5. The management arranged a special Lakshmi Ganapati Pooja, and seeing such dedication and rich rituals in our workspace was incredible.

Day 6: Rest & Reflection

Day 6 allowed us to recharge while welcoming clients who visited our office to seek Lord Ganesha's blessings and interact with our team.

Day 7: The Grand Visarjan, Auction, and Shoba Yatra

The most energetic day of all! We transitioned from the stage to the main hall for the famous Laddu Auction. The bidding went wild with participation from employees and clients alike:

- Big Laddu: Sold for ₹1,75,000 to Venkata Ramana.
- Small Laddu: Sold for close to ₹11,000 to the Kavitha team.

After a traditional Telugu feast (Annaprasadam) for lunch, our Shoba Yatra procession kicked off at 5:00 PM. Filled with firecrackers, flowers, DJ music, and lights, the Visarjan (immersion) continued until 3:00 AM. What an unforgettable day to be part of Clyptus!

Days 8 & 9: WFH and Lasting Memories

The final two days were reserved for rest and remote work. The 2026 Vinayaka Chavithi celebrations at Clyptus Software Solutions will remain an unforgettable chapter for our entire team.
